DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings were received on 9/13/04. These drawings are acceptable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 6-11, 13-20, 24-29, 32-35, 37-43, and 54-68 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kalevo et al (WO 98/41025).

Response to Arguments

5. Applicant's arguments filed 6/5/06 have been fully considered but they are not persuasive. Applicant asserts on pages 20-22 of the Remarks that Kalevo et al fails to disclose at least one parameter is determined on the basis of an examination of the types of encoding. However, according to applicant's analysis of the reference on page 22 of the Remarks, the examination process of Kalevo et al depends on various parameters. In particular, the size of quantization step used in the coding process (36 or 42) meets the claimed limitation in its broadest reasonable sense.

Applicant also asserts on page 23 of the Remarks that Kalevo et al fails to disclose filtering according to the block types as specified in claims 37-40. However, according to applicant's analysis of the reference, the filtering process of Kalevo et al also depends on the difference of pixel values between the 2 blocks. It is submitted that a large difference value or significantly different QP between two blocks across the boundary would indicate the blocks are of different types, thus meeting the claim limitation.

Applicant finally asserts on pages 23-24 of the Remarks that the last office action fails to provide any passages of Kalevo et al. However, it is noted that the ground of rejection is a 102(b) clearly anticipated rejection. One of ordinary skill in the art would have had no difficulty in recognizing that Kalevo et al illustrates the same filtering method as specified in Figures 1-5 of the present invention.

Allowable Subject Matter

6. Claims 12 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
